Style with Strength

The Hurst range of Hurricane roller shutter doors offer you stunning looks with full thermal and sound insulation to keep your home not only safe but also keep the heating bills down.

Fully insulated aluminium slats

The range is available in a broad range of stylish colours and wood finishes allowing you to match your door or shutters to your existing door, paintwork or double glazing for a truly coordinated look to your home and what's more they never need painting or varnishing!

The Hurricane range are made to measure so will fit most homes whether it's a double garage, or patio door or window security shutters.

For added peace of mind all of our roller shutters are supplied with a reassuring 2 year warranty and electric motors are guaranteed for 5 years.

The robust Hurricane shutters are manufactured from tough insulated aluminium slats that are unaffected by extremes of temperature and will resist attack by would be intruders.

The Hurricane range provides the following benefits:

- Convenient remote control access as standard
- Smooth opening and closing at the press of a button
- Excellent thermal & sound insulation
- Automatic door locking on closure
- Photo-electric safety device
- Low maintenance - never needs painting

Safety

A standard safety feature of our roller doors is the inclusion of an integrated infra-red photo electric safety beam which enables the door to stop automatically and return it to the open position should an unwanted obstruction be detected in the zone of the doors path. This feature, a distinct advantage over other bottom rail safety devices, works by detecting the obstruction before it touches the door, thus preventing possible injury or damage to the unit.

Remote Control Operation

Gone are the days of having to reluctantly get out of your car to struggle with the garage door when the heavens are opening or the wind is trying to knock you off your feet.

By using one of the two stylish compact handsets with key fob we supply with each unit, you can now open and close the garage door without having to leave the warmth and comfort of your vehicle!

Manual Override

In the unfortunate event of a power failure operating the door is not a problem as it can easily be opened from inside the garage by using a manual winding handle. Should there be no other access into the garage, an optional extra external manual winding system is also available.
